

COOKIES POLICY

LESCOVEX S.R.L. (hereinafter Lescovex or The Company) uses its own cookies on its website www.zironex.io to collect information about users, in order to ensure the effectiveness of the website and the platform and to be able to manage them.

Cookies are data files that are downloaded automatically and stored on the hard drive of the user's computer or in the memory of a device when browsing a specific website. They allow the Internet server to remember predetermined information about the actions and preferences of a user (such as login, language, display preferences, name and password, etc.) during a certain period of time, so that the user does not have to reconfigure settings or enter information again each time he or she navigates to the website.

The cookies help us to improve our Services and the user's experience, to see what areas and features of our Services are popular and count visits, to manage the account registration process, to remember a user's specific preferences and to retain certain information so as to process orders for exchange transactions and provide support when needed.

We only use our own cookies, especially session cookies, which are designed to collect and store data while the user accesses and uses the website. They only keep information needed for the provision of the services requested by a user on a single occasion. If users do not use the website during a certain period of time (one hour), the session will expire and users will have to log in again. The information collected by the session cookies will therefore be deleted when users have logged out or the session has expired due to inactivity.

In most browsers, cookies are automatically accepted by virtue of their default settings. However, the user can adjust their browser preferences to accept or reject cookies. Disabling cookies may disable various functions of the website/API or may cause them to display incorrectly. You can disable or delete cookies which have already been stored on your computer by accessing the tools provided to that effect by your browser. Further information can be obtained through the following links:
